SUMMARY	<ul style="list-style-type: none">Computer Vision Research Engineer specializing in on-device image enhancement, model optimization (SNPE/DLC, AIMET), and local LLM deployment (Ollama, llama.cpp).Strong research background with CVPR publications and a US patent in computational photography.
EDUCATION	<p>M.Sc. (Thesis), Computer Science 2018 – 2021 McGill University Thesis: Uncertainty in depth estimation using RGB-gated images Supervisor: Prof. Michael Langer GPA: 3.90/4.00</p> <p>B.Eng., Computer Engineering 2013 – 2018 York University GPA: 7.9/9.0</p>
TECHNICAL SKILLS	<p>Languages: Python, C++, C, Java, MATLAB, SQL Frameworks/Tools: PyTorch, Qualcomm SNPE, AIMET, OpenCV, TensorFlow, Keras, llama.cpp, Ollama, L^AT_EX Hardware: Qualcomm Snapdragon, Nvidia Jetson TX1, Huawei Atlas 200, Raspberry Pi</p>
EXPERIENCE	<p>Computer Vision Research Engineer, Samsung Research America Dec 2022 – Present Theme: Efficient Models for Image Enhancement</p> <ul style="list-style-type: none">Deployed image enhancement models to Qualcomm devices by converting pipelines to SNPE/DLC and resolving operator/runtime constraints for production inference.Built and optimized super-resolution and HDR components with a focus on on-device quality stability (artifact control, consistency across scenes) and runtime efficiency.Improved latency and memory footprint through deployment-oriented architecture changes and quantization workflows using AIMET. <p>Computer Vision Researcher, Algolux Aug 2021 – Dec 2022 Theme: Depth Estimation from RGB & Gated Images</p> <ul style="list-style-type: none">Developed a self-supervised depth estimation approach for gated imaging that improved generalization and closed the gap with prior supervised baselines under real capture conditions. <p>Machine Learning Engineer (Full-time Contract), Huawei Canada Mar 2021 – Aug 2021 Theme: Model Compression for NLP on NPU</p> <ul style="list-style-type: none">Ported low-rank decomposed GPT-2/CPM-style models to Huawei NPU execution constraints; validated accuracy/performance trade-offs and integration readiness.
PROJECTS	<p>Local LLM Exploration 2024 – Present</p> <ul style="list-style-type: none">Evaluated quantized LLMs (Llama-3, Mistral) on edge hardware using llama.cpp and Ollama; focused on GGUF format optimization and on-device performance profiling.
PUBLICATIONS	<ul style="list-style-type: none">Amirhossein Kazerooni, Maitreya Suin, Tristan Aumentado-Armstrong, Sina Honari, Amanpreet S. PATENTS

Dual-camera Joint Denoising-Deblurring using Burst of Short and Long Exposure Images. 2024
Inventors: Shayan Shekarforoush, **Amanpreet Singh Walia**, Aleksai Levinshstein, Konstantinos G. Derpanis, Marcus A. Brubaker
Patent Application: [US20240311968A1](#)
